Bypassing Exercise 5.

In Exercise 5 we create some key pairs to use for WS-Security.

You can do this lab if you like, but if you would prefer to do in your own time you can bypass that by doing the following commands on the command line:

```
cd
mkdir keys
cd keys
curl http://freo.me/ZaVTlR -o clientkeystore.jks
curl http://freo.me/STmyQc -o serverkeystore.jks
```
