Install WSO2 Developer Studio 2.1.0

Installing the ESB and BPEL tools into the Eclipse Helios system

Software Requirements
(see separate document for installation of these)
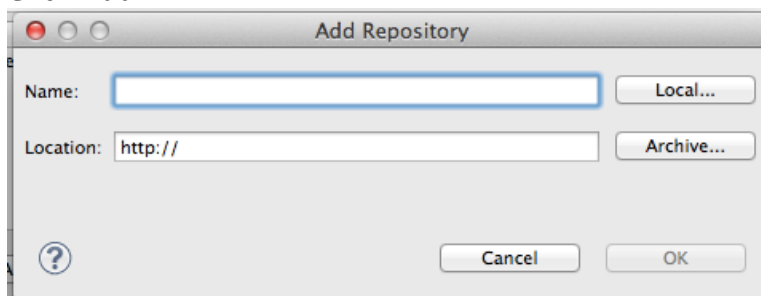

- Java Development Kit 7
- Eclipse

1. Start Eclipse

2. Goto Help/Install New Software

3. Click Add

4. Type **WSO2 Dev Studio 2.1.0** as the name
   Click Archive and browse to the file **wso2-developer-studio_2.1.0.zip**

5. Click OK

6. Select the checkbox next to WSO2 Developer Studio

7. Click Next, then Next again.

8. Click "I Accept…"

9. Click Finish
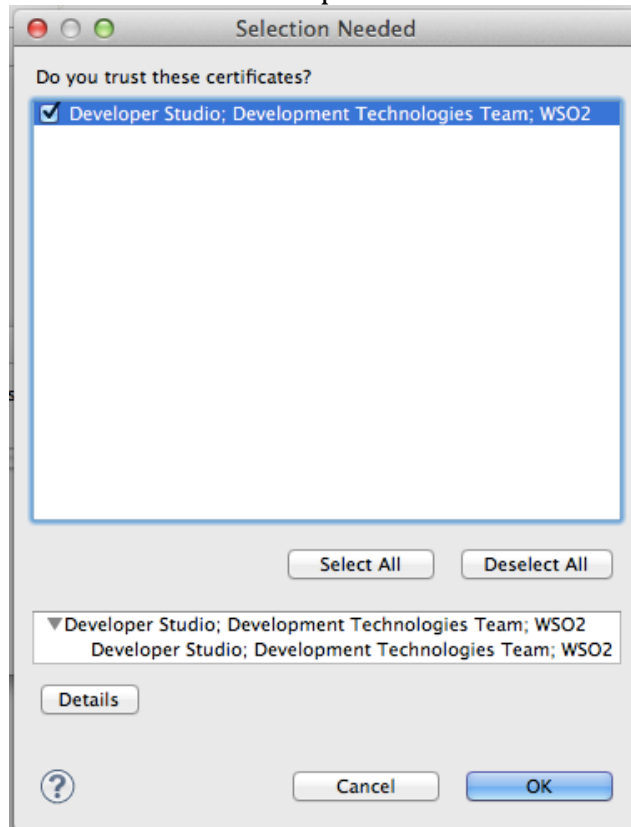

10. Go make some real coffee.

11. You will get a warning

12. Click OK

13. Trust me – I'm a developer
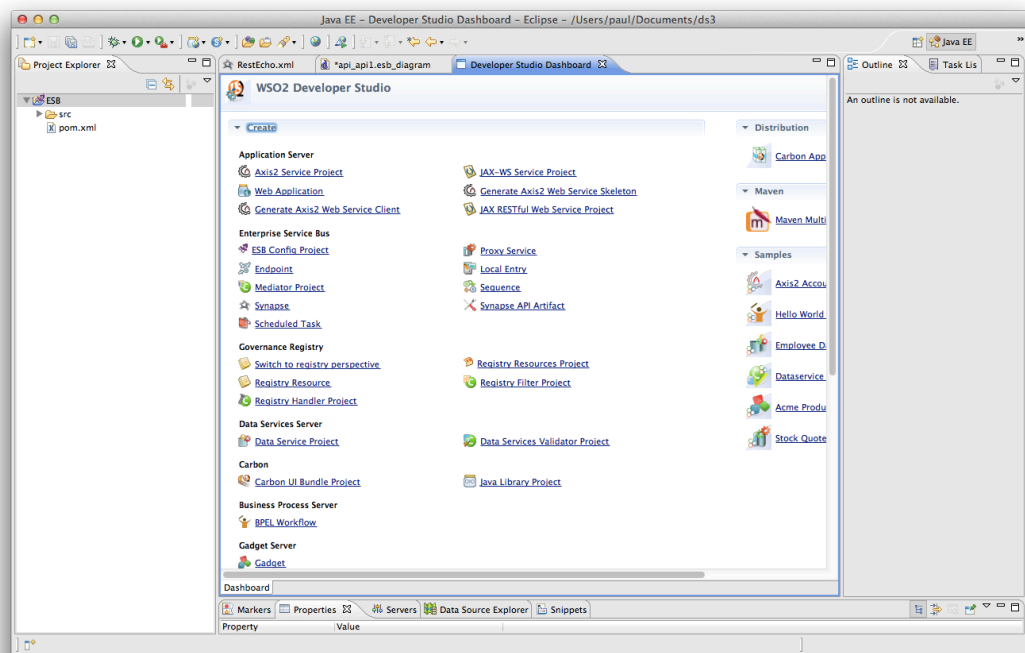

14. Select the checkbox and click OK.
Restart Now when prompted:

15. You should now be able to open up the Developer Studio Dashboard. You can always get back to the Dashboard from the top menu:

16. It should look like:

17. Congratulations
